BI & Automation Analyst with 3 years of experience translating business data into clear insights, streamlined reporting, and practical automation. Focused on improving operational visibility, reducing manual work, and building solutions that support faster business decisions.

## Experience

**Data Analyst - IT World (HP, Samsung and Ray-Ban Authorized Dealer)**

- **Unified store performance across 100+ retail stores** with a dashboard tracking sales, leads, and customer reviews.
- **Cut manual reporting effort by 60%** by converting unstructured Excel Profit & Loss reports into an interactive dashboard with automated reporting.
- **Streamlined HP service operations** by developing a web application for service-data tracking and reporting.
- **Automated customer follow-up** with one AI voice agent that calls customers 6 hours after a low rating, captures feedback, and summarizes issues - replacing team-led follow-up.
- **Automated daily manpower and payroll reporting** across 4 companies, emailing consolidated dashboards to Regional Heads and Business Heads instead of requiring a full day of manual work.
- **Improved incentive processing** by automating sales-incentive calculations for faster, more consistent payouts.
- **Tracked accessories performance** with an achievement tracker for sales-team targets.
- **Enabled production visibility** through a textile-mill monitoring system with automated WhatsApp reports.

**Junior Data Analyst - VU Solutions**

- **Combined 6 operational areas** - BOM, payments, site visits, expenses, customer details, and drawings - in one dynamic dashboard.
- **Built expense and engineer-performance dashboards** to track project costs and team productivity.
- **Built a WhatsApp chatbot** to collect customer drawings and estimates.
- **Prototyped AI-assisted workflows** using LLMs and SerpAPI for information retrieval.
